

384 Well Polypropylene Microplates

Flat (F) or Conical (V) Bottom, Standard Height

The set of flat and conical polypropylene microplates with 384 wells are manufactured to meet the standardised microplate footprint. Made from high-clarity polypropylene, these microplates are beneficial in all applications where higher heat stability or chemical resistance is required. These plates are compatible with current plate equipment and can be used for both manual and robotic handling. They are available in natural, white and black. The total volume per well is 152 µl for F-bottom and 130 µl for V-bottom microplates. The usual working volume is 15 to 145 µL (F-bottom) and 13 - 120 µl (V-bottom).

The microplates are free of detectable DNase, RNase, human DNA and pyrogens. Raised wells make them well suited to thermal or adhesive sealing. High performance sealing films, like VIEWseal™ (Cat. No. 676 070), AMPLIseal™ (Cat. No. 676 040), SILVERseal™ (Cat. No. 676 090), EASYseal™ (Cat. No. 676 001) or CapMats are recommended. Customised barcoding is also available upon request.

Key Facts

- For sample storage and biochemical assays
- Polypropylene with low binding of biomolecules
- F- and V-bottom available
- Sterile on request
- Barcode-labelled on request
- Standardised plate geometry (conform to ANSI 1-2004)
Length x Width x Height:
127.76 x 85.48 x 14.4 mm

Ordering Information

Cat. No.	Product Description	Quantity per Bag	Quantity per Case
781 201	384 well microplate, PP, F-bottom, natural	10	100
781 207	384 well microplate, PP, F-bottom, white	10	100
781 209	384 well microplate, PP, F-bottom, black	10	100
781 280	384 well microplate, PP, V-bottom, natural	10	100
781 287	384 well microplate, PP, V-bottom, white	10	100
781 289	384 well microplate, PP, V-bottom, black	10	100
